NH DHHS COVID-19 Update – April 7, 2020

Concord, NH – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update on the new coronavirus, COVID-19.

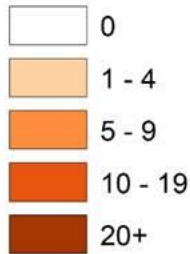

On Tuesday, April 7, 2020, DHHS announced 32 new positive test results for COVID-19. There have now been 747 cases of COVID-19 diagnosed in New Hampshire. Several of the new cases are still under investigation. Of those with complete information, all are adults with 53% being female and 47% being male. The new cases reside in Rockingham (8), Hillsborough County other than Manchester and Nashua (6), Merrimack (4), and Belknap (3) counties, and in the cities of Manchester (7) and Nashua (3). The county of residence is being determined for one new case. Three new COVID-19-related hospitalizations were reported; thus far, 108 (14%) of the 747 positive cases have been hospitalized. Twenty-one of the new cases have no identified risk factors. Community-based transmission continues to increase in the State and has been identified in all counties with cases. Most of the remaining cases have either had travel to domestic or international locations or have had close contact with a person with a confirmed COVID-19 diagnosis.

DHHS has also announced four additional deaths related to COVID-19. These were three males and one female, all 60 years of age or older. Two were residents of Hillsborough County, one was a resident of Cheshire County, and one was a resident of Rockingham County. We offer our sympathies to the family and friends.
